Create an Account on GitHub

The image shows two screenshots of the GitHub website. The top screenshot displays the profile page for 'nicholas-judson'. It includes a header with navigation links (Pull requests, Issues, Marketplace, Explore), a profile section with a bio, and a 'Popular repositories' section. A '1 contribution in the last year' graph is shown, indicating a single contribution on January 24th. The bottom screenshot shows the repository page for 'nicholas-judson / cmpt220judson'. It features a 'Quick setup' section with instructions for setting up the repository on a desktop, creating a new repository on the command line, pushing an existing repository from the command line, and importing code from another repository. The repository page also shows 'Watch', 'Star', and 'Fork' counts.

Learn how we count contributions. Less More

This is your contribution graph. Your first ■ is for joining GitHub and you'll earn more as you make additional contributions. More contributions means a darker green square for that day. Over time, your chart might start looking something like this.

We have a quick guide that will show you how to create your first repository and earn more green squares!

Quick setup — if you've done this kind of thing before

[Set up in Desktop](#) or [HTTPS](#) [SSH](#) <https://github.com/nicholas-judson/cmpt220judson.git>

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# cmpt220judson" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/nicholas-judson/cmpt220judson.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/nicholas-judson/cmpt220judson.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.
